

# Creativity Is My Middle Name

👉 [Meet Akshat Jain](#)

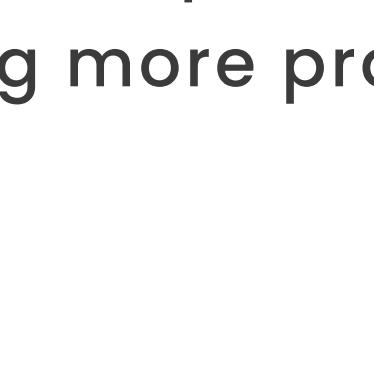

## I D E A L O G Y

**Working the things like the most and that's why my job feels me like I am on Vacation. Not so experienced but a hungry learner. Unorthodox creativity makes me different and making and achieving small goals seems to me as success.**

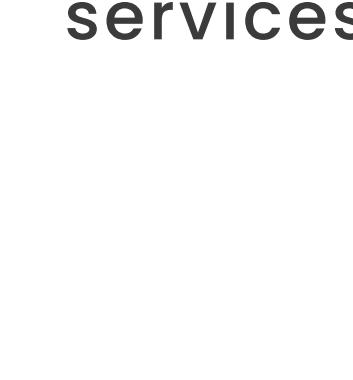

### UI UX Design

Working on it for a few months now. Quite good with the colour picking and good hand on photo and video editing part

### Front End Development

Quite a lot of experience with HTML CSS Bootstrap. But a newbie for the animation and javascript part. But as I know UI/UX part helps me being more practical

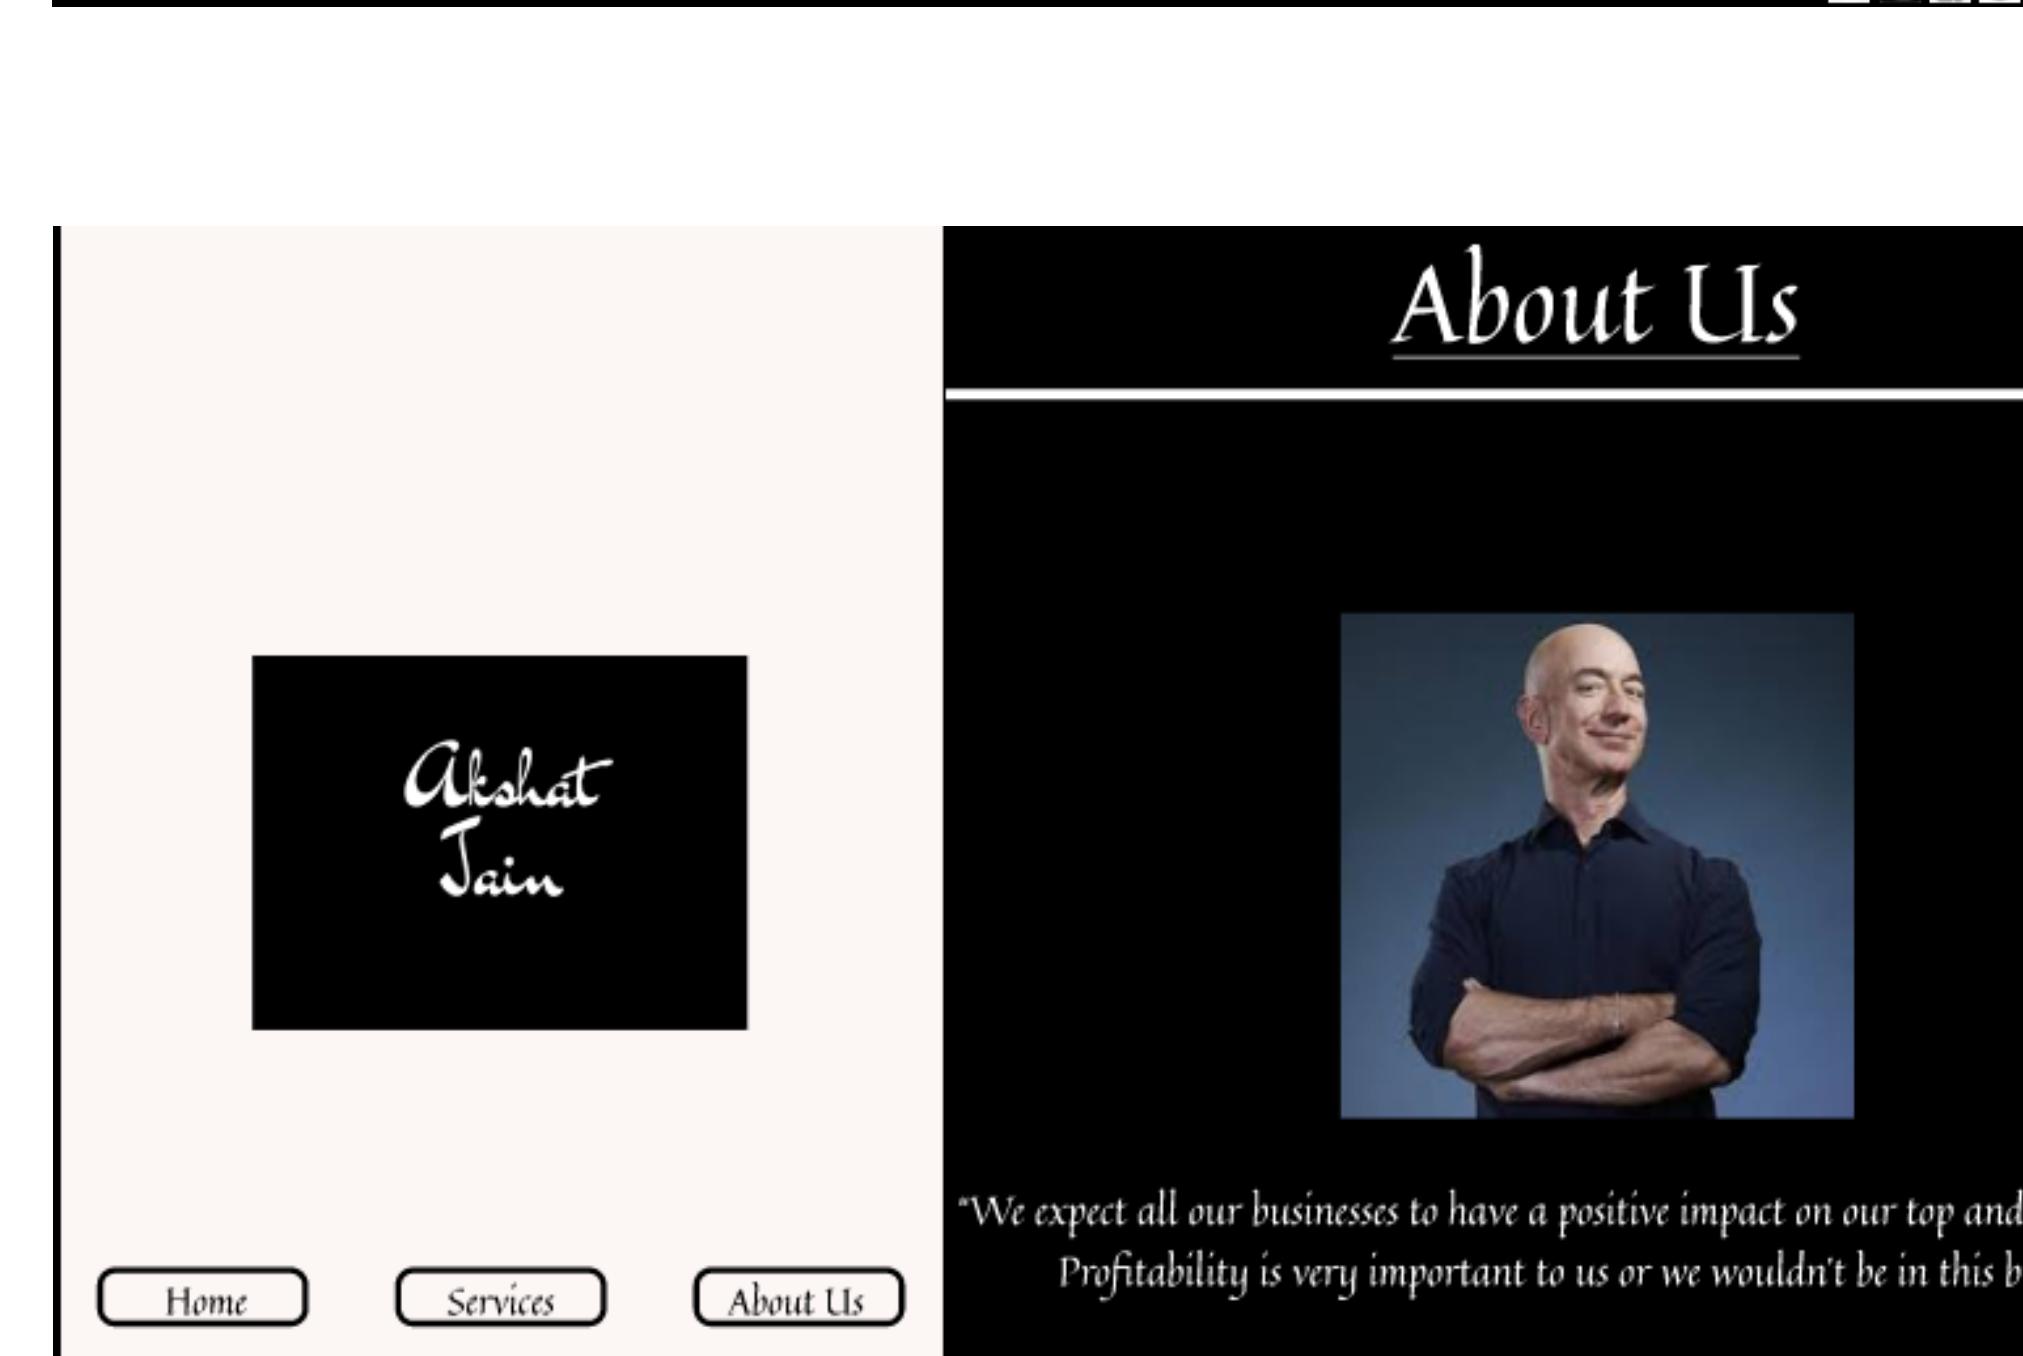

### Influencer

Working as a Tech and Fashion influencer as my hobby which help me excel with my public speaking and conveying people to use my services.

## P R O J E C T - 1

### FIRST PORTFOLIO SITE

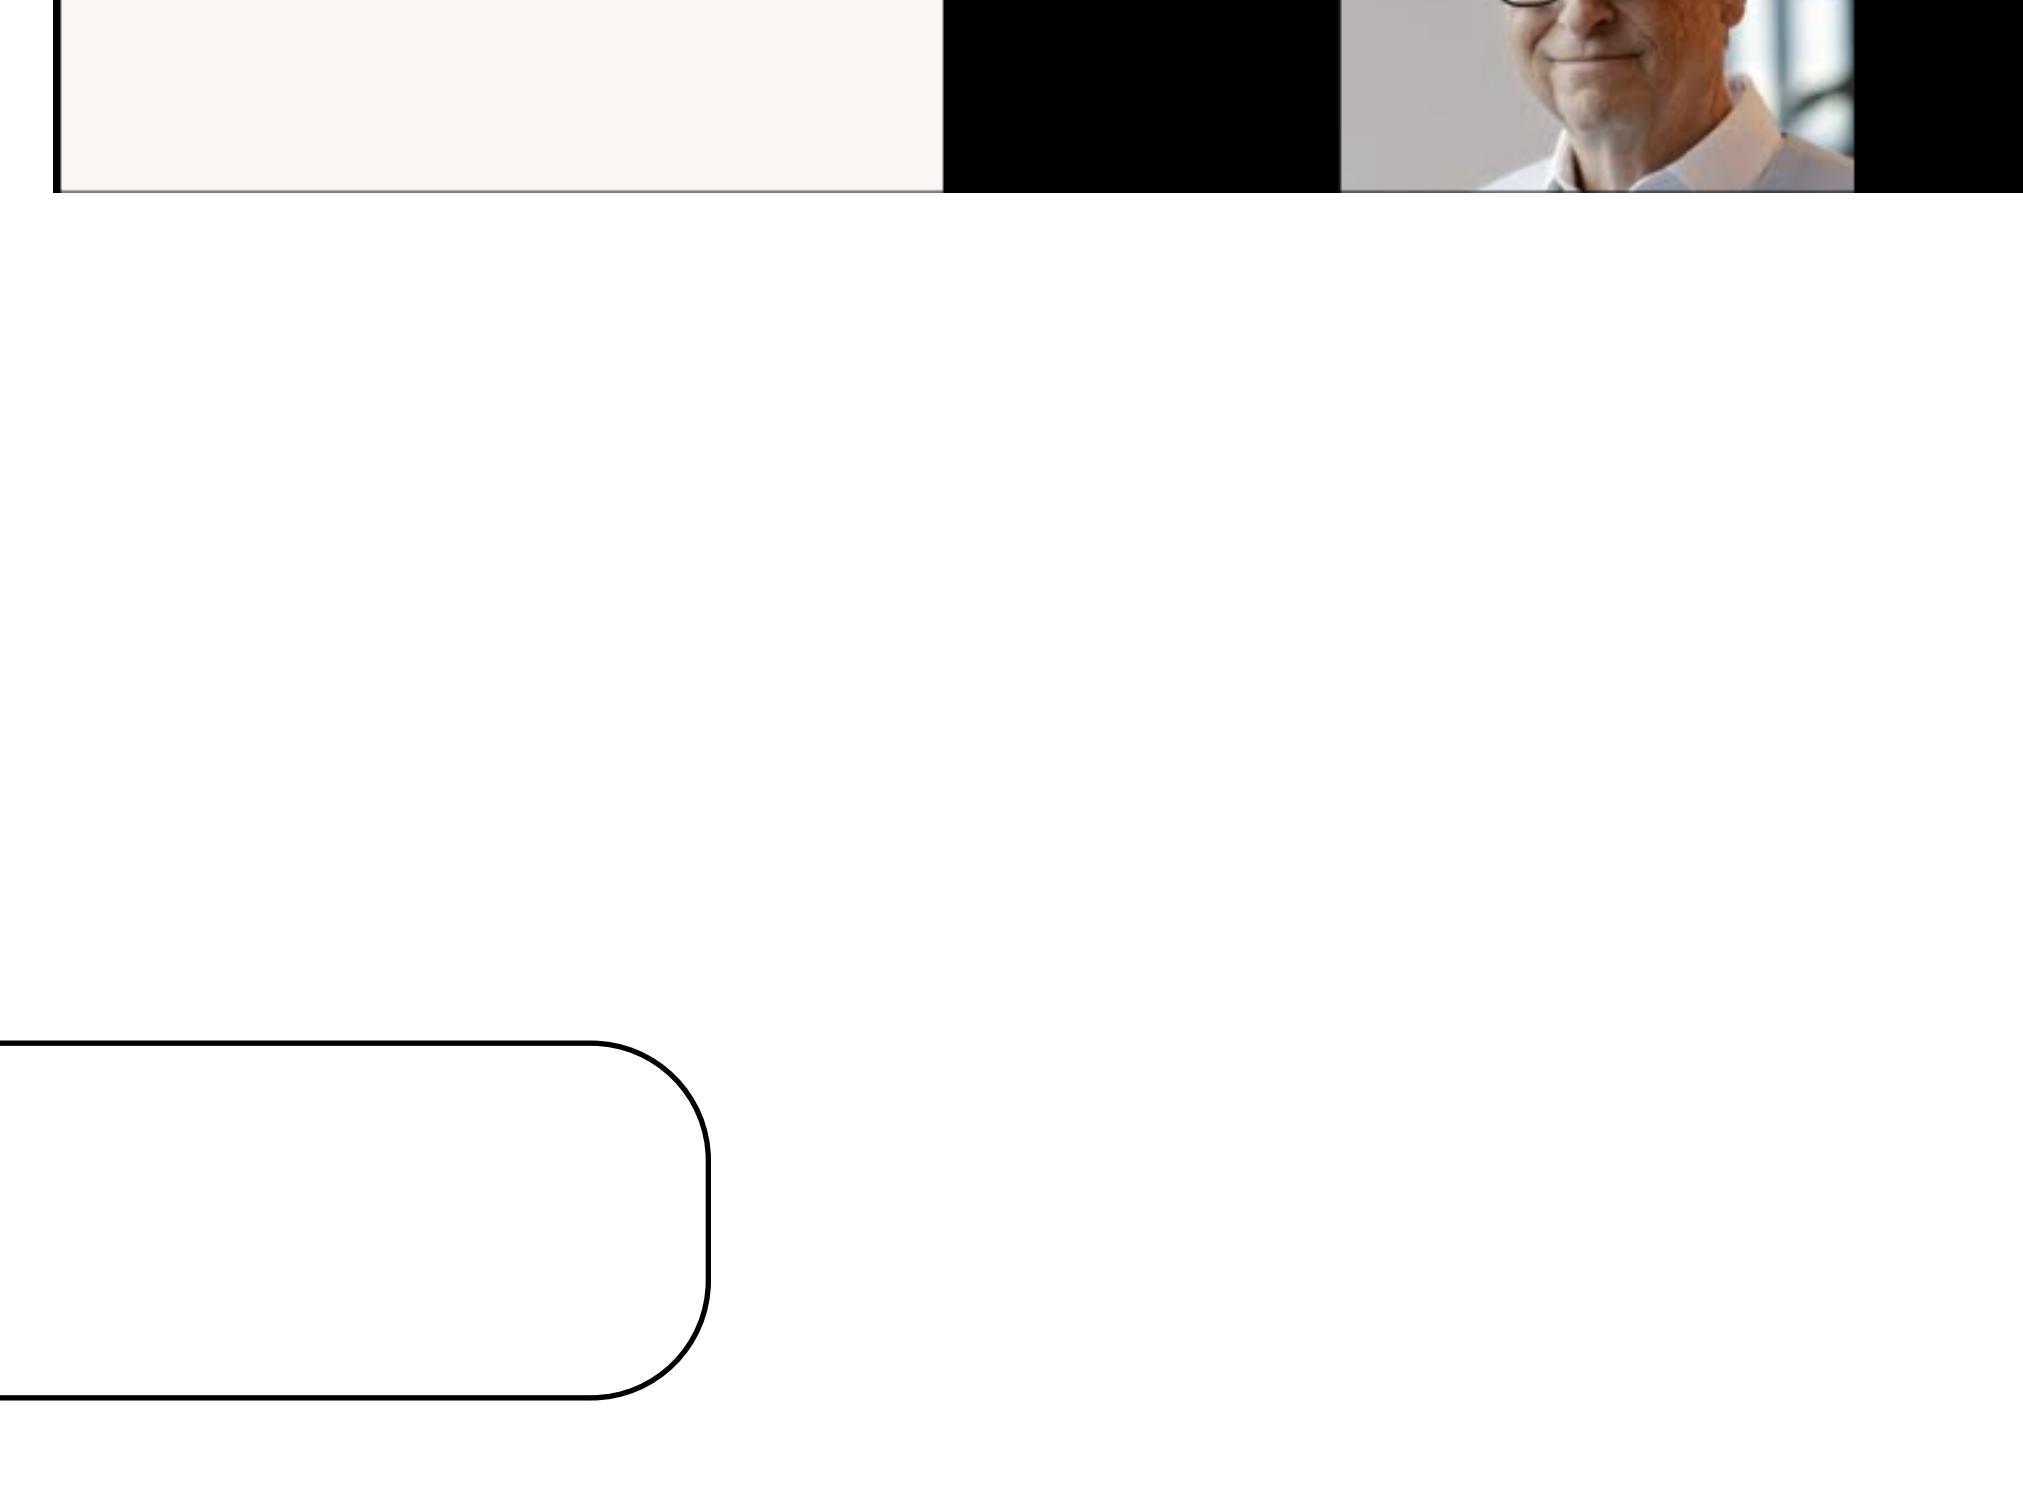

This was the first site I made it with the help of html, css, bootstrap and a bit of javascript. I learnt quite a lot from about the colour schemes use of different properties of javascript and bootstrap.

### FIRST UI UX PROJECT

This was a concept idea of a site with the use of only two colours that were white and black. This site showed about a company, its employees and the services they provide. With the help of this project I was able to learn the usage of software like figma and Adobe XD.
